## TOWN HALL PLANNING ONLINE SURVEY

October, 2022

To: New Marlborough Resident Citizens  
From: Town Hall Planning Committee  
Re: Future of Town Hall Survey

Our current Town Hall is not compliant with Federal and State Law as respects accessibility requirements for individuals with handicaps. Recently, an architectural plan was developed to reach compliance. Our Town **must comply** but implementing the changes as well as addressing other deficiencies in the structure will come at a high dollar cost.

The Town Hall Planning Committee was given the task to consider how to proceed, including whether investment elsewhere might provide existing Town Hall functions, compliant accessibility, and possibly additional options at a lower cost.

Your answers to the questions in this online survey will provide important input to the Committee as we proceed. We urge you to respond to this relatively short survey by clicking on the link below by October 20, 2022.

**This is the same survey that you may have received in the mail. Please respond either on paper or online--one survey response per person.**
